### Scheduling Info

Please visit the Request Access tab above to initiate a request for MRI access. You will receive an email after your access is approved by the Center staff.

The calendars below can be used to book scans once you have been approved to schedule.

**When start a new project, please contact Dr. Eugene G. Kholmovski (ekholmo1@jhu.edu) to set up the protocol at least 1 week before the scan.**

If you need additional scheduling instructions, please contact Dr. Hanzhang Lu, Director of the MRI Service Center, at [hlu3@jhmi.edu](mailto:hlu3@jhmi.edu).

### Billing Info

Billing for MRI Service Center studies is done based on the time booked and used in the scanner. The start time of the bill will be the start of the booking or actual use, whichever is earlier. The end time of the bill will be the end time on the booking or actual, whichever is later.

1.5T scanner: Siemens 1.5T Espree

3T scanners: Siemens Prisma 3T, Philips Achieva 3T (XMR1)

\$114 fee for contrast agent provided by us

Films and CDs of the study can be requested from the Radiology Customer Service Center at 7-7378. We can arrange to send the images to you in a DICOM format via the network also.

There is no set contract fee for each research protocol so, for example, one patient might take more time than another and would cost you more.

Cancellations occurring less than 72 hours in advance are billed for 13.986% percentage of reservation total and no-shows are billed 100% of scheduled time unless we fill the time with another user.

### MR Safety Training

Each user of the MRI Service Center must undergo MR safety training.

Please login to [myLearning](#) first, then take:

[MRI Safety Training Level I](#) ----- all MRI Service Center users

[MRI Safety Training Level II](#) ----- Work in the MRI scanner room

After done, upload the certificate to iLab

## ▼ Request Access

	Sort manually	Add a Service Project Template	
--	---------------	--------------------------------	--

Prior to beginning your study, you will need the following information to gain access to MRI scheduling.

1. Principle Investigators name and email.
2. Title of the study.
3. Category (human, animal, phantom).
4. Which MRI scanner; 3T Philips, 3T Siemens, or Siemens 1.5T.
5. IRB or IACUC Number(s).
6. A current copy of the JHH-IRB or ACUC approval letter and complete animal protocol document(not just the protocol number).
7. Body part or organ to be scanned.
8. How do you want the data stored? E.g. transfer for PACS.
